Shoot. Then play in your DVD player. With Hitachi's dual-format DVD camcorders, you get to choose between DVD-R and DVD-RAM formats. Choose the DVD-R format when you want to shoot and insert the disc directly in your DVD player. Select the DVD-RAM format if you want to record, erase and re-record on a single disc up to 100,000 times, perform editing functions, or shoot up to almost 2,000 stills.
