

Baronet 

No electrician required to install this compact electric screen.

The BARONET offers an excellent, lower-cost alternative to hardwired motorized screens. No electrician is required with the BARONET. Just install the motorized screen and plug it in. It's that simple. Its 10' power cord plugs into the nearest wall outlet. The BARONET is controlled by a 3-position, in-line operating switch.

Its attractive case fits in most spaces. Case measures only 3¼" high x 3¼" deep and still houses the quiet, trouble-free motor. Endcaps form universal mounting brackets making installation easy whether it is mounted on a wall, suspended or recessed above the ceiling. Both brackets extend ½" above the case.

The BARONET's pentagonal-shaped steel case has a scratch-resistant white polyester finish.

Viewing surface choices are fiberglass matt white, glass beaded and HIGH CONTRAST GREY.

- **Extra drop**—Up to 8' overall height, either surface color or black. (Surface color standard for AV format, black for other formats.)
- **Black masking borders**—Borders are optional for AV format screens and standard for all other format screens.
- **Control options**—Provided with 3-position in-line operating switch with U.S. plug certified by UL.

Case Dimensions/Method of Installation
