High sensitivity for beautiful photos!

ISO 1600 + 5.1 Mega Pixels

Prevent blur with high sensitivity!

ISO 100 equivalent, 1/28 sec., F2.8

ISO 1600 equivalent, 1/500 sec., F2.8

Even backgrounds come out beautifully!

With flash

Natural Light mode (without flash)

Save the moment forever with 5.1 megapixel image resolution. Capture every detail under challenging conditions with sensitivity up to ISO 1600. Every time you press the shutter of the new FinePix V10, you can be confident of beautiful results. Featuring our advanced Real Photo Technology, this stylish compact camera makes it so easy to take beautiful photos with superb image and color quality. Sensitivity is the difference between a blurry snap shot to be erased and a sharp photo to add to your album. The high sensitivity of the FinePix V10 lets you take pictures at a high shutter speed and eliminate blurring from camera shake or subject movement. It is also the key to the amazing Natural Light mode that lets you take wonderful pictures under low-light conditions without a flash, capturing even the background beautifully.

New

N & ⚡ Press the shutter once and get two shots.

Just select the new "Natural Light & with Flash" mode, and press the shutter once to take two photos in rapid succession: one in "with Flash" and one in "Natural Light (without flash)". In low light, strong backlighting, and other challenging situations when you cannot decide whether to use flash or not, this two-shot mode makes sure you always have a photo with the best possible setting. Also for users who want a creative choice, you can easily take two photos of the same scene and later choose between a photo that captures the entire atmosphere of the scene or the flash shot that highlights the subject or enjoy both!

Natural Light mode (In the case of dim lighting)

with Flash (In the case of strong backlighting)

Minimum noise even at high sensitivity

With conventional digital cameras, the noise level increases when a higher ISO sensitivity is used. Featuring Fujifilm's original Real Photo technology, the FinePix V10 delivers high image quality while reducing noise to a minimum, even at high sensitivity settings.

Conventional digital camera

FinePix V10

Exactly the photo you want for every scene.

Versatile Shooting Modes

The FinePix V10 offers a variety of shooting modes. For every situation, there is an ideal mode for exactly the image you want.

3.4x Optical Zoom

- High Speed Shooting
- Movie
- Continuous Shooting

Full-back LCD for viewing enjoyment!

3.0 inch LCD Monitor

Actual size

The extra-large LCD monitor of the compact FinePix V10 gives you a spacious 3.0 inch screen to compose your picture and 230,000 pixels for comfortable viewing of impressive results. With this big full-back LCD, everyone can gather around and enjoy looking at beautiful photos together. Both shooting and viewing photos is a real pleasure with the FinePix V10.

3.0 inch LCD

Extra-convenient functions for the Full-back LCD

Focus Check

Still guessing about focus? Just choose this setting in the Image Display menu, and you can zoom in and immediately confirm the sharpness of focus and image details after each shot!

Multi-frame playback screen (30-frame display)

Still searching for photos one by one? Displaying up to 30 thumbnail images at a time on the big display, this mode lets you quickly find the desired photo.

Slide Show

Still viewing photos one by one? With one press of a button, the FinePix V10 automatically produces and displays a slideshow. You can choose from various slideshow formats with impressive transitions. Just gather around and view the results together with your family and friends on the big 3.0 inch display.

Games for More Photo Fun

With the FinePix V10, it's a pleasure to take and view photos. Now you can have fun playing four games with them on the spacious LCD.
